

A Society of Believers

The Care Net Champions for Life Society is a group of believers driven by our mission and committed to accomplishing the long-term vision of Care Net through sustained financial support to our pro-life ministry. This support is unique in that it relates especially to the medical services, technology, and qualified staffing of our medical centers now and into the future. Early intervention services such as pregnancy testing, ultrasound confirmation and options counseling provided at our centers is mission critical in saving precious lives. Support from the Champions for Life Society allows Care Net to plan ahead with confidence that we will be able to sustain these life-saving medical services in the years ahead.

Are you a Champion for Life?

Be a part of a society that upholds the fundamental value of human life and commits to serving abortion-vulnerable women with life-affirming services now and well into the future.

CHAMPIONS for LIFE SOCIETY

Uplifting the sanctity of human life
by sustaining life-affirming, early intervention medical services
for individuals experiencing an unplanned pregnancy

WHAT IS A CHAMPION FOR LIFE?

When the law of the land fails to protect the preborn, ***a champion fights*** for the rights of those unable to fight for themselves.

When current culture devalues the lives of children conceived in unplanned circumstances, ***a champion defends*** the fundamental value of all human life.

When society pressures a woman to “escape” her circumstances by ending an unintended pregnancy, ***a champion empowers*** her with the truth that she is stronger than her circumstances and offers her support in her decision to choose life for her child.

A champion fights, defends, and empowers.

A Champion for Life fights for the right to life, defends the sanctity of human life, and supports individuals experiencing an unplanned pregnancy, empowering them to choose life.

champion

[cham-pee-uhn]

noun

a person who fights or argues for a cause or on behalf of someone else.

verb

defend; support:

to champion a cause.

DONOR SUPPORT

The donations Care Net raises annually are sufficient to cover our three centers' operating expenses and the cost of our parenting education programs. We are good stewards of the donations and support given to this ministry and are now engaged in the steady growth outlined in our strategic plan. This growth includes increasing the life-saving medical services offered at our centers, enhancing technology and equipment used to provide these services, and building and retaining the qualified staff needed to meet the increased demand for client services.

OUR HOPE

Timing is critical.

In less than five minutes, a woman taking a pregnancy test learns she is pregnant. Especially if the pregnancy is unexpected, she may immediately feel uncertain and anxious. She needs to talk to someone now, but who can she trust?

An internet search or referral from a friend presents this new mother with several options, including abortion. Care Net is determined to be the first place these women turn to at this critical time. With a call to our 24-hour Helpline or one of our centers, women can talk about their fears and concerns and make an appointment to be seen in a safe, compassionate environment. She will take a medical-grade pregnancy test and, if that test is positive, we will offer an ultrasound to confirm the pregnancy is properly located in the uterus and gauge the baby's gestational age. Critically, the ultrasound also will show the woman the unmistakable reality of life within her womb.

By receiving these life-affirming services at this critical time in their lives, and knowing Care Net will be there for them with material, emotional and spiritual support, most women will choose life for their babies.

OUR VISION

Sustain Same Day Ultrasound Services

Our goal is to sustain same day ultrasound appointments at all three of our locations every day they are open. Same day ultrasound service is critical to saving lives because abortion-minded women often are reluctant to return for a second appointment after a positive pregnancy test. In 2023 through September, 94% of our patients chose life, deciding either to make an adoption plan or parent, after confirmation of pregnancy by ultrasound.

We actively pray that our advertising on Google and social media platforms and our presence at local health fairs and other events will reach such women not only to save their babies but also to save them from a lifetime of regret.

Increase Medical & Support Staff

To continue our ultrasound program, we must hire, train and certify additional registered nurses or nurse practitioners to perform limited obstetric ultrasounds. Because we are a medical facility, we are required by law to have registered nurses or nurse practitioners conduct medical history for our patients. Most registered nurses and nurse practitioners do not have formal training or certification in performing ultrasounds. Certification requires 75 separate practice ultrasounds and takes six to 12 months to complete. Our training program is critical to providing same day ultrasounds.

Retain Critical Medical Staff

Currently, the average hourly rate for a registered nurse in Kentucky is \$35/hour or more, with comprehensive benefits, shift differential, and a wage increase after one year of service. Our hourly starting rate is \$22/hour without shift differential or benefits except paid time off and paid vacation. Our goal is to offer a competitive wage to ensure we retain required registered nurses and nurse practitioners in a tight labor market.
